A Pal

Rubber-soled
Shoes

Skate Board

Roller Blades

May 2015

For more water safety tips, visit water.ca.gov/recreation/safety/

Answer: life jacket, rubber-soled shoes, drinking water and a pal

Water Safe For Life with Albert & Einstein

Along the **California State Water Project**

California's State Water Project

is a great place to have fun while being water safe. It's made of many lakes and hundreds of miles of aqueducts. The California Department of Water Resources' water safety mascots Albert and Einstein want kids to follow these safety tips while

Fishing, Boating or **Swimming** at the **lakes**.

Wear a life jacket

Go with a buddy

Obey safety signs

Wear rubber-soled shoes

Tell others where you will be at all times

And if something falls in the water, just let it go

While some people fish along the California Aqueduct, it is NOT a Safe place to swim and play!

If you fall into the Aqueduct, you can drown. Albert and Einstein want us to remember to be safe.

Fishing can be DANGEROUS

at the **Aqueduct**. Follow these safety tips:

-  Obey safety signs
-  Sides are slippery
-  Don't play near the Aqueduct
-  Look for safety ladders and lines
-  Wear a life jacket

The California Aqueduct (below) is an open canal used to move water throughout California.
